## PREFACE.

---

In these Tables, interest is computed upon the basis of 360 days to the year, in accordance with the law and usage of every State in the Union, with one exception. In New York, many of the Banks compute interest on the basis of 365 days; but business men in general, conform to the usual rule, which has strong claims to preference on the ground of convenience.

To secure accuracy in Averaging Accounts, however, it is necessary that the actual number of days intervening between the items shall be counted; accordingly for Averaging, the dates are extended through a period of which one day is the 365th,—January 1st being the first day, and December 31st the last day of the series. By this arrangement, it is plain that the Average date can be as correctly ascertained as by the 365 day Tables.

# TIME TABLE.

## FIRST YEAR.

| Days. | JAN. | FEB. | MAR. | APR. | MAY. | JUNE. | JULY. | AUG. | SEP. | OCT. | NOV. | DEC. | Days. |
|-------|------|------|------|------|------|-------|-------|------|------|------|------|------|-------|
| 1     | 1    | 32   | 60   | 91   | 121  | 152   | 182   | 213  | 244  | 274  | 305  | 335  | 1     |
| 2     | 2    | 33   | 61   | 92   | 122  | 153   | 183   | 214  | 245  | 275  | 306  | 336  | 2     |
| 3     | 3    | 34   | 62   | 93   | 123  | 154   | 184   | 215  | 246  | 276  | 307  | 337  | 3     |
| 4     | 4    | 35   | 63   | 94   | 124  | 155   | 185   | 216  | 247  | 277  | 308  | 338  | 4     |
| 5     | 5    | 36   | 64   | 95   | 125  | 156   | 186   | 217  | 248  | 278  | 309  | 339  | 5     |
| 6     | 6    | 37   | 65   | 96   | 126  | 157   | 187   | 218  | 249  | 279  | 310  | 340  | 6     |
| 7     | 7    | 38   | 66   | 97   | 127  | 158   | 188   | 219  | 250  | 280  | 311  | 341  | 7     |
| 8     | 8    | 39   | 67   | 98   | 128  | 159   | 189   | 220  | 251  | 281  | 312  | 342  | 8     |
| 9     | 9    | 40   | 68   | 99   | 129  | 160   | 190   | 221  | 252  | 282  | 313  | 343  | 9     |
| 10    | 10   | 41   | 69   | 100  | 130  | 161   | 191   | 222  | 253  | 283  | 314  | 344  | 10    |
| 11    | 11   | 42   | 70   | 101  | 131  | 162   | 192   | 223  | 254  | 284  | 315  | 345  | 11    |
| 12    | 12   | 43   | 71   | 102  | 132  | 163   | 193   | 224  | 255  | 285  | 316  | 346  | 12    |
| 13    | 13   | 44   | 72   | 103  | 133  | 164   | 194   | 225  | 256  | 286  | 317  | 347  | 13    |
| 14    | 14   | 45   | 73   | 104  | 134  | 165   | 195   | 226  | 257  | 287  | 318  | 348  | 14    |
| 15    | 15   | 46   | 74   | 105  | 135  | 166   | 196   | 227  | 258  | 288  | 319  | 349  | 15    |
| 16    | 16   | 47   | 75   | 106  | 136  | 167   | 197   | 228  | 259  | 289  | 320  | 350  | 16    |
| 17    | 17   | 48   | 76   | 107  | 137  | 168   | 198   | 229  | 260  | 290  | 321  | 351  | 17    |
| 18    | 18   | 49   | 77   | 108  | 138  | 169   | 199   | 230  | 261  | 291  | 322  | 352  | 18    |
| 19    | 19   | 50   | 78   | 109  | 139  | 170   | 200   | 231  | 262  | 292  | 323  | 353  | 19    |
| 20    | 20   | 51   | 79   | 110  | 140  | 171   | 201   | 232  | 263  | 293  | 324  | 354  | 20    |
| 21    | 21   | 52   | 80   | 111  | 141  | 172   | 202   | 233  | 264  | 294  | 325  | 355  | 21    |
| 22    | 22   | 53   | 81   | 112  | 142  | 173   | 203   | 234  | 265  | 295  | 326  | 356  | 22    |
| 23    | 23   | 54   | 82   | 113  | 143  | 174   | 204   | 235  | 266  | 296  | 327  | 357  | 23    |
| 24    | 24   | 55   | 83   | 114  | 144  | 175   | 205   | 236  | 267  | 297  | 328  | 358  | 24    |
| 25    | 25   | 56   | 84   | 115  | 145  | 176   | 206   | 237  | 268  | 298  | 329  | 359  | 25    |
| 26    | 26   | 57   | 85   | 116  | 146  | 177   | 207   | 238  | 269  | 299  | 330  | 360  | 26    |
| 27    | 27   | 58   | 86   | 117  | 147  | 178   | 208   | 239  | 270  | 300  | 331  | 361  | 27    |
| 28    | 28   | 59   | 87   | 118  | 148  | 179   | 209   | 240  | 271  | 301  | 332  | 362  | 28    |
| 29    | 29   |      | 88   | 119  | 149  | 180   | 210   | 241  | 272  | 302  | 333  | 363  | 29    |
| 30    | 30   |      | 89   | 120  | 150  | 181   | 211   | 242  | 273  | 303  | 334  | 364  | 30    |
| 31    | 31   |      | 90   |      | 151  |       | 212   | 243  |      | 304  |      | 365  | 31    |

## EXAMPLES.

How many days from March 1st to July 4th? Subtract 60,—under March and opposite 1, in column of days, from 185,—under July and opposite 4, in column of days.

*Ans.* 125 days.

# TIME TABLE.

## SECOND YEAR.

| Days. | JAN. | FEB. | MAR. | APR. | MAY. | JUNE. | JULY. | AUG. | SEPT. | OCT. | NOV. | DEC. | Days. |
|-------|------|------|------|------|------|-------|-------|------|-------|------|------|------|-------|
| 1     | 366  | 397  | 425  | 456  | 486  | 517   | 547   | 578  | 609   | 639  | 670  | 700  | 1     |
| 2     | 367  | 398  | 426  | 457  | 487  | 518   | 548   | 579  | 610   | 640  | 671  | 701  | 2     |
| 3     | 368  | 399  | 427  | 458  | 488  | 519   | 549   | 580  | 611   | 641  | 672  | 702  | 3     |
| 4     | 369  | 400  | 428  | 459  | 489  | 520   | 550   | 581  | 612   | 642  | 673  | 703  | 4     |
| 5     | 370  | 401  | 429  | 460  | 490  | 521   | 551   | 582  | 613   | 643  | 674  | 704  | 5     |
| 6     | 371  | 402  | 430  | 461  | 491  | 522   | 552   | 583  | 614   | 644  | 675  | 705  | 6     |
| 7     | 372  | 403  | 431  | 462  | 492  | 523   | 553   | 584  | 615   | 645  | 676  | 706  | 7     |
| 8     | 373  | 404  | 432  | 463  | 493  | 524   | 554   | 585  | 616   | 646  | 677  | 707  | 8     |
| 9     | 374  | 405  | 433  | 464  | 494  | 525   | 555   | 586  | 617   | 647  | 678  | 708  | 9     |
| 10    | 375  | 406  | 434  | 465  | 495  | 526   | 556   | 587  | 618   | 648  | 679  | 709  | 10    |
| 11    | 376  | 407  | 435  | 466  | 496  | 527   | 557   | 588  | 619   | 649  | 680  | 710  | 11    |
| 12    | 377  | 408  | 436  | 467  | 497  | 528   | 558   | 589  | 620   | 650  | 681  | 711  | 12    |
| 13    | 378  | 409  | 437  | 468  | 498  | 529   | 559   | 590  | 621   | 651  | 682  | 712  | 13    |
| 14    | 379  | 410  | 438  | 469  | 499  | 530   | 560   | 591  | 622   | 652  | 683  | 713  | 14    |
| 15    | 380  | 411  | 439  | 470  | 500  | 531   | 561   | 592  | 623   | 653  | 684  | 714  | 15    |
| 16    | 381  | 412  | 440  | 471  | 501  | 532   | 562   | 593  | 624   | 654  | 685  | 715  | 16    |
| 17    | 382  | 413  | 441  | 472  | 502  | 533   | 563   | 594  | 625   | 655  | 686  | 716  | 17    |
| 18    | 383  | 414  | 442  | 473  | 503  | 534   | 564   | 595  | 626   | 656  | 687  | 717  | 18    |
| 19    | 384  | 415  | 443  | 474  | 504  | 535   | 565   | 596  | 627   | 657  | 688  | 718  | 19    |
| 20    | 385  | 416  | 444  | 475  | 505  | 536   | 566   | 597  | 628   | 658  | 689  | 719  | 20    |
| 21    | 386  | 417  | 445  | 476  | 506  | 537   | 567   | 598  | 629   | 659  | 690  | 720  | 21    |
| 22    | 387  | 418  | 446  | 477  | 507  | 538   | 568   | 599  | 630   | 660  | 691  | 721  | 22    |
| 23    | 388  | 419  | 447  | 478  | 508  | 539   | 569   | 600  | 631   | 661  | 692  | 722  | 23    |
| 24    | 389  | 420  | 448  | 479  | 509  | 540   | 570   | 601  | 632   | 662  | 693  | 723  | 24    |
| 25    | 390  | 421  | 449  | 480  | 510  | 541   | 571   | 602  | 633   | 663  | 694  | 724  | 25    |
| 26    | 391  | 422  | 450  | 481  | 511  | 542   | 572   | 603  | 634   | 664  | 695  | 725  | 26    |
| 27    | 392  | 423  | 451  | 482  | 512  | 543   | 573   | 604  | 635   | 665  | 696  | 726  | 27    |
| 28    | 393  | 424  | 452  | 483  | 513  | 544   | 574   | 605  | 636   | 666  | 697  | 727  | 28    |
| 29    | 394  |      | 453  | 484  | 514  | 545   | 575   | 606  | 637   | 667  | 698  | 728  | 29    |
| 30    | 395  |      | 454  | 485  | 515  | 546   | 576   | 607  | 638   | 668  | 699  | 729  | 30    |
| 31    | 396  |      | 455  |      | 516  |       | 577   | 608  |       | 669  |      | 730  | 31    |

When will a note dated March 4th, at 90 days, mature? To 63, under March and opposite 4, add 93: the sum, 156 is found under June, and opposite 5. *Ans.* June 5th.

How many days from Nov. 26, 1870, to April 5th, 1871? From 460, under April and opposite 5, in SECOND YEAR, subtract 330, under November and opposite 26 in FIRST YEAR. *Ans.* 130 days.

In Leap Year, when February intervenes, an allowance of 1 day must be made.

## EXPLANATIONS.

### TO ASCERTAIN INTEREST.

Find the table which has at its head the number of days for which interest is required, and opposite the principal will be seen the interest, at *1 per cent.*, in dollars, cents and mills, and at *10 per cent.*, in dollars and cents; for the latter rate, the decimal point being removed one place to the right, mills being taken as units of cents.

Thus, the interest on \$5000, for 93, days (page 95) at 1 per cent., is \$12.91,7; at 10 per cent., \$129.17

To ascertain interest at other rates, set down the interest at 1 per cent. in dollars, cents and mills, and multiply by the required rate, rejecting the mills from the *product*; the fractional excess having already been allowed in the tables.

What is the interest on \$968 for 93 days, at 7 per cent?

Under 93 days, at top of page 95, we find

|               |        |
|---------------|--------|
| Opposite 900, | 2.32.5 |
| “ 60,         | .15.5  |
| “ 8,          | .02.1  |

$$2.50.1 \times 7 = 17.50.7. \text{ Ans. } \$17.50$$

### FOR AVERAGING ACCOUNTS.

*When the account runs through one year only; or between January 1st and December 31st:*

Find the amounts in each item of the account in the table having its date at the *top* of the page, and set down the interest in dollars, cents and mills. Add 2 ciphers to the sum of the interest and divide by the amount of the account, until there are 3 places of decimals in the quotient. The result of

this division will be found opposite 100, in the interest column having the average date at its head.

#### EXAMPLE.

When does the following account mature?

|                 |                             |        |
|-----------------|-----------------------------|--------|
| Feb. 23d, \$970 | Under Feb. 23d, opp. 900 is | 1.35.0 |
| " " " "         | 70 "                        | .10.5  |
| July 17th, 430  | " July 17th, " 400 "        | 2.20.0 |
| " " " "         | 30 "                        | .16.5  |
| Oct. 31st, 600  | " Oct. 31st, " 600 "        | 5.06.7 |

\$2000

$8.88.7 \div 2000 = .444$

which is found opposite 100, under date of June 9th, the average date.

NOTE.—When the exact amount of the account can be found in the column headed "Principal," no division is necessary. In such cases, look for the sum of the interest, opposite the amount of the account, and above it will be found the average date.

Thus, 8.88.9 (the nearest approximate sum to 8.88.7) is found opposite 2000, under date of June 9th.

*When the account runs through parts of two years; or between July 1st, in one year, and June 30th, in the next year.*

Find the interest on each item of the account in the Table having its date at the *bottom* of the page. Divide the sum of the interest by the amount of the account, and find the quotient opposite 100 in the Column of interest *over* the average date, at the *bottom* of the page.

#### EXAMPLE.

|                |  |        |  |  |  |  |        |
|----------------|--|--------|--|--|--|--|--------|
| 1871.          |  |        |  |  |  |  |        |
| Nov. 25, \$300 | Over Nov. 25 at foot of page, opp. 300, is | 1.23.3 |  |  |  |  |        |
| 1872.          |  |        |  |  |  |  |        |
| May 13, 700    | " May 13 " " " " " " 700, "                | 6.16.4 |  |  |  |  |        |
| \$1000         |  |        |  |  |  |  | 7.39.7 |

$7.39.7 \div 1000 = .739$

which is found in the interest column, opposite 100, *over* March 23d, the average date, at the *foot* of the page.

Or, without division, 7.38,9 (the nearest approximate sum to 7.39,7) is found opposite 1000 in the column having March 23d at its foot.

*When the account runs through several years; or when more than one year intervenes between the first and last items.*

Find the interest on each item, under its date, at the top of the page, and to the interest on the items which overrun one year, and for each year of such excess, add 365 days interest on such items. Divide the sum of the interest by the amount of the account, and if the quotient exceeds the interest on \$100 for 365 days, subtract the interest on \$100 for 365 days from such quotient, and find the remainder opposite 100 under the average date, which will be in the 2d, 3d, &c. years, according to the amount of the excess of such quotient over the interest on \$100 for 365 days.

#### EXAMPLE.

|            |       |   |        |
|------------|-------|---|--------|
| 1871.      |       |   |        |
| March 4th, | \$300 | Under March 4th, opp. \$300 is              | .525   |
| 1873.      |       |   |        |
| April 5th, | 700   | “ April 5th, “ 700 “                        | 1.847  |
|            |       | Interest on \$700 for 365 days, 7.097 × 2 = | 14.194 |
|            |       |   | <hr/>  |
|            |       |   | 16.566 |

$$16.5600 \div 1000 = 1.656 - 1.014 = .642$$

Which is found under date of August 19th, of the second year (1872).

It is evident that the average date of the above account is not in the year 1871, as under date of Dec. 31st, (365 days) \$100. earns only \$1.014. The excess, .642 carries the average date forward to Aug. 19th, in the next year.

*When sales are made on different terms of credit, and when there are items of debit and credit.*

## EXAMPLE IN COMPOUND AVERAGE.

When is the balance of the following account due:

| DR.       |                       | CR.       |                       |
|-----------|-----------------------|-----------|-----------------------|
| 1871.     |                       | 1871.     |                       |
| May 5th   | To Mdse. 60 days, 500 | May 10th  | By note, 60 days, 200 |
| Aug. 17th | " Cash, 300           | July 15th | " Cash, 100           |
|           | <hr/>                 |           | <hr/>                 |
|           | 800                   |           | 300                   |
|           | 300                   |           |                       |
|           | <hr/>                 |           |                       |

500 balance of account.

|                                     |                                     |
|-------------------------------------|-------------------------------------|
| Under July 4th, ( <i>due date</i> ) | Under July 9th, ( <i>due date</i> ) |
| opposite 500 is 2.569               | opposite 200 is 1.056               |
| " Aug. 17th, " 300 " 1.908          | " July 15th, " 100 " .544           |
| <hr/>                               | <hr/>                               |
| 4.477                               | 1.600                               |

$$4.477 - 1.60 = 2.877 \div 500 = .575.$$

which is found opposite 100 under July 26th, the average date.

Or, without division, opposite 500, is found 2.875 (the nearest approximate sum to 2.877) under July 26th, the average date.

As this account runs through one year only, or between January 1st and December 31st, find the interest on each item *under* its date (*due date*) at *top* of page; subtract the lesser from the greater side of the account; divide the *balance* of interest by the *balance* of the account; and the quotient will be found opposite 100, under the average date.

### *To Compute Time by the Tables.*

At the head of the pages, the days throughout the year are numbered from January 1st to December 31st inclusive, and at the foot of the pages from July 1st in one year to June 30th in the next year.

Hence, To find the time between two dates in one year.

*Subtract the number of days of the first date from the number of days of the last date.*

How many days from March 4th to July 4th?  
July 4th, is the 185th, day of the year.

Mch. 3d, " " 63d, " " " "

---

By Subtraction, 122 = number of days intervening.

When the first date is in one year, and the last date in the next year,

*Use the dates at the bottom of the page, and proceed as before.*

*To find the date of maturity of a note.*

Find the number of days of the date of the note, and add to it the number of days, including grace, the note has to run; the sum will be the number of the day of maturity.

When will a note at 90 days from Nov. 26th, mature?

|  |           |
|--|-----------|
| Nov. 26th, is at foot of column headed | 149 days, |
| Add (including grace)                  | 93        |

---

|   |           |
|---|-----------|
| Feb. 27th, the due date, is found at foot<br>of Column headed | 242 days. |
|---|-----------|

## ABBREVIATED METHOD OF COMPUTING INTEREST AT DIFFERENT RATES.

The interest on any sum for one day, at six per cent., is equivalent to the interest on the same sum, for six days, at one per cent.; for one day, at 7 per cent., to 7 days at one per cent., &c.

Again, the interest on one dollar, at 7 per cent., is equivalent to the interest on \$7 at one per cent., for the same time; on one dollar at 6 per cent., to \$6, at one per cent., &c.

Hence the interest on any sum, at any rate per cent., can be ascertained by multiplying the *time*, or the *principal* by the rate per cent., and finding the interest at one per cent., for the time, or on the principal, indicated by the product.

### EXAMPLES.

1. Required, the interest on \$7000 for 40 days, at 7 per cent.  
 $40 \times 7 = 280$ .

In column of 280 days, opposite 7000, is found \$54.44. *Ans.*

2. What is the interest on \$1000 for 40 days, at 6 per cent?  
 $1000 \times 6 = 6000$

In column of 40 days, opposite 6000, is found \$6.67. *Ans.*

Again, as the interest on 1 dollar for 2 days, is equivalent to the interest on \$2 for 1 day; on 3 dollars for 6 days, to \$6 for 3 days, &c., the interest on any amount under \$365, or under \$3650, in multiples of 10, may be found at a glance, by substituting dollars for days, and days for dollars.

### EXAMPLES.

1. What is the interest on \$248, for 90 days, at 10 per cent?  
Turn to column of days 248, and opposite 90 is found \$6.20.

*Ans.*

2. What is the interest on \$2860, for 20 days at 10 per cent?  
Turn to column of days 286, and opposite 200 is found \$15.89. *Ans.*

As the above rules are correlative, the intelligent accountant will readily perceive that their application to the Tables will enable him to compute interest on all sums, at all rates, with as much accuracy and dispatch as is attainable by the use of much more cumbrous and expensive works.

# APPENDIX.

# TABLE

*Showing the amount of \$1 for any number of years  
from 1 to 20, INTEREST COMPOUNDED SEMI-  
ANNUALLY.*

For the compound interest, subtract 1 from the amount.

| Years           | 5 per Ct. | 6 per Ct. | 7 per Ct. | 8 per Ct. | 9 per Ct. | 10 per Ct. |
|-----------------|-----------|-----------|-----------|-----------|-----------|------------|
| $\frac{1}{2}$   | 1.025     | 1.030     | 1.035     | 1.04      | 1.045     | 1.05       |

### DIRECTIONS.

To find the value of Shillings and Pence expressed in decimals of a £, find the Shillings in the left hand vertical column, and the Pence in the upper horizontal row.

The result will be found where the vertical column and horizontal row, found as above, intersect each other.

TO DECIMALS OF THE £ STERLING.

## BUSINESS CALCULATIONS.

The repetitions which appear in the following Rules were made advisedly, with a view to aid the accountant in their specific application.

### PERCENTAGE.

In Percentage three things are to be considered :

1. The Rate.
2. The Base.
3. The Percentage.

Two of these being known, the third can be ascertained.

I. *To find the percentage, multiply the base by the rate expressed decimally.*

II. *To find the rate, divide the percentage by the base.*

III. *To find the base, divide the percentage by the rate expressed decimally.*

### EXAMPLES.

1. What is 7 per cent. of \$500?

$$500 \times .07 = 35.00. \text{ Ans. } \$35.$$

2. What per cent. of 120 is 12?

$$12 \div 120 = .10. \text{ Ans. } 10 \text{ per cent.}$$

3. 35 is 7 per cent. of what number?

$$35 \div .07 = 500. \text{ Ans. } 500.$$

IV. To find what number is a certain per cent. more or less than a given number.

1. *If the given number is greater than the required number, divide the given number by 1 plus the rate per cent. expressed decimally.*

2. *If the given number is less than the required number, divide the given number by 1 minus the rate per cent. expressed decimally.*

### EXAMPLES.

1. Gold being at 15 per cent. premium, how much can be bought for \$690 in currency?

$$1 + .15 = 1.15; 690 \div 1.15 = 600. \text{ Ans. } \$600.$$

2. If goods are sold for \$120, at a loss of 40 per cent., what did they cost?

$$1 - .40 = .60; 120 \div .60 = 200. \text{ Ans. } \$200.$$

3. A broker receives \$4100, which he is directed to invest in stock, after deducting his commission of  $\frac{1}{4}$  per cent. What amount must he invest? How much is his commission?

$$1 + .025 = 1.025; 4100 \div 1.025 = 4000, \text{ Amt.}$$

$$4100 - 4000 = 100, \text{ Commission.}$$

## PROBLEMS IN INTEREST.

### V. TO FIND THE *RATE*,

*the principal, interest or amount, and time being given.*

**RULE.**—*Divide the given interest, by the interest of the principal, for the given time, at one per cent.*

If instead of the interest, the *amount* is given, subtract the principal from it, to find the interest.

#### EXAMPLE.

At what rate will \$600 amount to \$609.30 in 93 days?

$$609.30 - 600 = 9.30 = \text{interest.}$$

Interest on \$600, for 93 days @ 1 per cent. (see Interest Tables) 1.55.

$$9.30 \div 1.55 = 6. \text{ Ans. } 6 \text{ per cent.}$$

### VI. To find the *principal*, when the time, rate per cent. and interest are given.

**RULE.**—*Divide the given interest by the interest on \$1., for the given time, at the given rate.*

#### EXAMPLE.

What sum invested at 7 per cent. for one year, will yield \$350 interest?

$$\text{Interest on } \$1, \text{ for 1 year at 7 per cent.} = .07$$

$$350 \div .07 = 5000. \text{ Ans. } \$5000.$$

VII. To find the *principal*, when the time, rate per cent. and amount are given.

**RULE.**—*Divide the given amount, by the amount of \$1, for the given time, at the given rate.*

**EXAMPLE.**

What principal will amount to \$609.30, in 93 days, at 6 per cent. per annum?

Amount of \$1 for 93 days, at 6 per cent. = \$1.0155

$609.30 \div 1.0155 = 600$  Ans. \$600.

VIII. To find the *time*, when the principal, rate per cent. and interest are given.

**RULE.**—*Divide the given interest, by the interest on the principal, at the given rate, for one day, one month or one year, according to the terms of the problem.*

**EXAMPLE.**

In how many days will \$600, produce \$9.30, interest at 6 per cent. per annum?

Interest on \$600, for 1 day, at 6 per cent. = .10

$9.30 \div .10 = 93$ . Ans. 93 days.

---

## PARTIAL PAYMENTS.

When partial payments are made on mercantile accounts which are past due, and on notes *running for a year or less*, it is customary to use the

### IX. VERMONT RULE.

1. Compute the interest on the principal, from the time when it was due, to the time of settlement, and add it to the principal.

2. Compute the interest on each payment, from the time it was made, to the time of settlement, and add the sum of the interest on the payments, to the sum of the payments.

3. Subtract the amount of the payments, including interest, from the amount of the principal, including interest, and the remainder will be the balance due.

By this rule, payments made before the principal is due, are not applied to the discharge of the interest, but are used to reduce the principal.

---

When the note or account runs through more than one year, the Courts of many of the States, and the U. S. Supreme Court have adopted the following rule, which is generally called the

#### X. UNITED STATES RULE.

*Apply the payment in the first place to the discharge of the interest then due; if the payment exceeds the interest, the surplus goes towards discharging the principal, and the subsequent interest, is to be computed on the balance of principal remaining due. If the payment be less than the interest, the surplus of the interest, must not be taken to augment the principal; but interest continues on the former principal, until the period when the payments taken together equal or exceed the interest due, and then the surplus is to be applied toward discharging the principal, and interest is to be computed on the balance as aforesaid.*

Or, apply the payments, in the first place, to the discharge of the interest; then the principal.

---

Merchants generally strike a balance for successive periods of a year, 6 months, &c., allowing interest on the principal and on the several balances, and also on payments made during such periods from the date of payment to the close of the period.

This is an application of the Vermont rule to each separate year or period, beginning with the date of the note or obligation and making yearly, or other periodical rests. The rule is as follows:

#### XI. THE MERCANTILE RULE.

*Find the amount of the principal and interest for one year or period, and subtract from it the*

amount of each payment made during the year or period, and its interest from its date to the end of the year or period; the remainder forms a new principal

*Proceed in the same manner for each entire year or period that follows, together with such portion of a year or period, as may intervene between the last annual or periodical term, and the time of settlement.*

Of these rules, the Vermont rule is the most favorable to the debtor, as it involves no compound interest and all the payments draw interest. Both the Mercantile rule, and the United States rule compound interest, the former once a year, or period, the latter as often as a payment is made, which equals or exceeds the interest then due,

---

## PRESENT WORTH AND DISCOUNT.

The *Present Worth* of a sum due at a future time, is that sum which placed at interest for the given time, at the given rate, will amount to the debt.

The *Discount* is the difference between the present worth, and the face of the debt, and is really the interest on the present worth.

---

## XII. TO FIND THE PRESENT WORTH.

RULE.—*Divide the given sum by the amount of \$1, for the given time, at the given rate.*

---

## XIII. TO FIND THE DISCOUNT.

RULE.—*Subtract the present worth from the given sum.*

### EXAMPLE.

What is the present worth of \$106, due one year hence, interest at 6 per cent.? What is the discount?

Amount of \$1. for 1 year at 6 per cent. = 1.06

$106 \div 1.06 = 100 = \text{Present Worth}$

$106 - 100 = 6 = \text{Discount.}$

## XIV. BANK DISCOUNT.

Bank Discount is computed on the face of the note instead of on the present worth, and is deducted at the time of making the loan. It is equivalent to simple interest paid in advance for *four* days more than the time specified in the note; the discount day, as well as the day of maturity, being added to three days of grace, in reckoning the time for which interest is to be computed.

XV. To find for what sum, a note must be drawn in order to obtain a particular loan at bank.

*RULE.*—Find the bank discount on \$1, for the given time, (including grace) at the given rate: Subtract this discount from \$1, and divide the given sum by the remainder.

### EXAMPLE.

For what sum must a note at 90 days be drawn, so that the discount at 6 per cent., may be deducted and the proceeds be \$1500?

$$\begin{aligned} \text{Bank discount on \$1, for 94 days} &= .01567 \\ 1 - .01567 &= .98433; 1500 \div .98433 = 1523.88 \\ \text{Ans.} &\$1523.88 \end{aligned}$$

## XVI.

### TO COMPUTE TIME IN MONTHS & DAYS.

*RULE.*—Designate the months by their numbers instead of their names: “3d month” instead of March, “6th month” instead of June, &c., and solve the given problem by Compound Addition or Subtraction.

### EXAMPLE.

How many months and days from the 3d of May, (5th month) to the 11th of October, (10th month) 1871?

| Y.   | m.    | d.    |
|------|-------|-------|
| 1871 | .. 10 | .. 11 |
| 1871 | .. 5  | .. 3  |

5 .. 8 Ans. 5 mo, 8 days.

How many months and days, from October 11th, 1871, to May 3d, 1872?

| Y.                   | m. | d. |   |    |
|----------------------|----|----|---|----|
| 1872                 | .. | 5  | ; | 3  |
| 1871                 | .. | 10 | ; | 11 |
| <hr/>                |    |    |   |    |
| 0 ; 6 ; 22           |    |    |   |    |
| Ans. 6 mo., 22 days. |    |    |   |    |

In connection with the above rule, for computing time in months and days, it may be well to give, for the benefit of those who may not always have the Tables at hand, the following easily remembered and

## XVII. SHORT METHOD OF AVERAGING ACCOUNTS BY INTEREST.

**RULE.**—1. *Reckon in months and days, the time intervening between and including the FIRST day of the month in which the FIRST item is due, and the DUE dates of the several items of the account, and set the time thus found opposite the respective items.*

2. *Compute the interest on each item for the time thus found, at ONE PER CENT. PER MONTH.*

3. *Divide the sum of the interest by the interest for one month on the amount of the account: the quotient will be the average time in months. If there is a remainder, reduce the fraction of a month to days.*

### EXAMPLE.

When does the following account mature?

|                    |        |
|--------------------|--------|
| March 10th,        | \$470. |
| May 15th,          | 850.   |
| July 25th, (3 mo.) | 930.   |
| Aug. 20th,         | 720.   |
| <hr/>              |        |
| 2970.              |        |

# OPERATION.

|                       | Time.        | Interest. |
|-----------------------|--------------|-----------|
| March 10th,           | 10 days 470  | 1.56      |
| May 25th,             | 2m. 15 " 850 | 21.25     |
| Aug. 20th,            | 5 " 20 " 720 | 40.80     |
| Oct. 25th, (due date) | 7 " 25 " 930 | 72.85     |

Interest at 1 per cent. for one month on 2970 = 29.70) 136.46 (4m.  
 11880  
 1766

1766  
 30

2970) 52980 (17  $\frac{249}{297}$  days.

2970

23280

20790

2490

The average date of the above account, is 4 months and 18 days, (the remainder being more than *half* the divisor) after 3d month (March) 1 or 7th month (July) 18th.

Ans. July 18th.

When sales are made on *time*, be careful to include the term of credit in the computation of time: the average of an account being determined by the *due* dates of the items.

As some months contain more than 30 days, the result, by the above rule, will differ slightly in some instances from that obtained by the usual method; but in ordinary cases the difference is so trifling that the slight inaccuracy is more than counterbalanced by the saving of time and labor in averaging.

By adding 1 day for each of the months containing 31 days and deducting for February, greater accuracy may be secured.

NOTE.—It is a singular fact that a rule of such practical value to the commercial accountant as that above given for computing time and averaging

payments, should—once being known—ever be permitted to sink into desuetude. Yet the writer believes he is safe in asserting that not more than one accountant in a hundred is aware of its existence, much less of its terms. Modern arithmetic makers, too, seem to have declined with one accord to rescue it from oblivion; for of *twelve* arithmetics which the writer has examined, only *one*\* makes any mention of it. So little is it known, that a man has for several years been able to drive a thriving business in our principal cities by canvassing it as his *invention*, and selling it as a *secret* at \$5 a head!

The writer believes that the surviving pupils of Timothy Clowes, L.L.D., formerly of Jefferson School, Philada., will recognize in the above rule an old acquaintance.

---

## PROFIT AND LOSS.

XVIII. To find the gain or loss when the cost and rate per cent. are given.

RULE.—*Multiply the cost by the rate per cent. expressed decimally.*

XIX. To find the cost when the selling price and rate per cent. of profit or loss are given.

RULE.—*Divide the selling price by 1 plus the rate per cent. of profit, or 1 minus the rate per cent. of loss, expressed decimally.*

### EXAMPLES.

Sold goods for \$480, realizing 20 per cent. profit. What did they cost?

---

\*The Crittenden Arithmetic, a valuable work for the counting-house.

$$1 + .20 = 1.20; 480 \div 1.20 = 400. \text{ Ans. } \$400.$$

Sold goods for \$135, at a loss of 10 per cent.  
What was the cost?

$$1 - .10 = .90; 135 \div .90 = 150. \text{ Ans. } \$150.$$

XX. To find the rate per cent. of profit or loss, when the gain or loss, or cost and selling price are given.

**RULE.**—*Divide the gain or loss by the cost.*

**EXAMPLE.**

Sold goods for \$168, which cost \$140. What per cent. was gained?

$$168 - 140 = 28 = \text{gain}; 28 \div 140 = .20. \text{ Ans. } 20 \text{ per cent.}$$

XXI. To find the rate per cent. of profit or loss at a proposed selling price, the actual selling price and rate per cent. of profit or loss being given.

**RULE.**—1. *From the actual selling price obtain the cost (§ XIX).*

2. *Find the amount of gain or loss, at the proposed selling price by subtraction.*

3. *Divide the gain or loss by the cost.*

**EXAMPLE.**

1. Sold silk for \$3.60 per yard, at a profit of 20 per cent. What per cent. of profit would have been realized if it had been sold for \$4.?

$$1 + .20 = 1.20; 3.60 \div 1.20 = 3.00. \text{ Cost.}$$

$$\$4.00 - 3.00 = 1.00 = \text{proposed profit;}$$

$$1.00 \div 3.00 = .33\frac{1}{3}.$$

$$\text{Ans. } 33\frac{1}{3} \text{ per cent.}$$

2. Sold goods for \$100 at a loss of 20 per cent. What would have been the rate per cent. of loss if sold for \$75?

$$1 - .20 = .80; 100 \div .80 = 125. \text{ Cost.}$$

$$125 - 75 = 50 \text{ proposed loss; } 50 \div 125 = .40.$$

$$\text{Ans. } 40 \text{ per cent.}$$

XXII. To find the selling price on which a certain rate per cent. of discount may be made, and the goods sold at cost, or at a given rate of profit or loss.

RULE—TO SELL AT COST.

*Divide the cost by 1 MINUS the rate per cent. of discount.*

TO SELL AT A GIVEN RATE PER CENT. OF  
PROFIT OR LOSS.

*Multiply the cost by 1 PLUS the rate per cent. of profit, or by 1 MINUS the rate per cent. of loss, and divide the product by 1 MINUS the rate per cent. of discount.*

EXAMPLES.

1. Bought goods for \$190: for how much must they be sold, that a discount of 5 per cent. may be made and the cost realized?

$$1 - .05 = .95; 190 \div .95 = 200. \text{ Ans. } \$200.$$

2. Bought goods for \$190; at what price must they be marked that a discount of 5 per cent. may be made to customers, and yet a profit of 20 per cent. realized?

$$190 \times 1.20 = 228.; 228 \div .95 = 240. \text{ Ans. } \$240.$$

---

Losses not unfrequently occur through errors in calculations of profit when a *discount* is made. If goods are sold at a profit of 10 per cent. and a discount of 5 per cent. on the selling price is allowed, the gain is *not* 5 per cent. but  $4\frac{1}{2}$  per cent. If goods are sold at a profit of 25 per cent., and a discount of 20 per cent. is allowed, the *apparent* gain is 5 per cent. but the goods are really sold at cost; in each case the profit being calculated on the first cost only, while the discount is calculated on the cost, *plus* the profit.

Again, mistakes sometimes occur in the following class of cases :

It is usual on "*time bills*" to allow a discount of 5 per cent. for cash payments within 30 days. This discount is allowed on the *amount* of the bill ; but often when part payments are made, the discount is computed on the cash payment instead of on *the proportion of the bill extinguished by such payment*, which causes a loss to the buyer.

If a cash payment of \$3800 be made on a bill of \$5000 the payment cancels \$4000 : but if the discount is computed on the amount of the payment, it will cancel only \$3990 ; a difference of \$10.

Hence,

XXIII. To find what proportion of a bill is settled when part only is paid.

RULE.—*Divide the payment by 1 MINUS the rate per cent. of discount.*

$1 - .05 = .95$  ;  $3800 \div .95 = 4000$ .    *Ans.* \$4000.

---

## EXCHANGE.

The limits of this work forbidding an extended discussion of the subject, **STERLING EXCHANGE**, or *Exchange on England*, only will be considered.

The unit of value in English moneys of account is the £ sterling ; its coined representative, the *Sovereign*, being worth *intrinsically* \$4.866 ; but allowing for the wear of coin, the value as established by Act of Congress and as estimated at the U. S. Custom House, is \$4.84.

But by the immemorial usage of Bankers, the £ Sterling has been valued by the old Spanish milled Dollar in the proportion of \$4.444 to the £, and this old value is still the basis of exchange : the present exchangeable value being expressed by a *premium* on this basis. Hence, when exchange

is quoted at  $9\frac{1}{2}$  per cent. premium, it is really at par

---

## XXIV. TO REDUCE STERLING TO FEDERAL MONEY.

**RULE.**—*Multiply the given amount by 40, divide the product by 9, and multiply the quotient by 1 plus the premium.*

### EXAMPLE.

What is the value of £100 exchange being at  $9\frac{1}{2}$  per cent?

$$100 \times \frac{40}{9} = 444.444 \times 1.095 = 486.66.$$

Ans. 486.66.

See Tables "Sterling into Federal money."

## XXV. TO REDUCE FEDERAL MONEY TO STERLING.

**RULE.**—*Multiply the given amount by 9, divide the product by 40, and divide the quotient by 1 PLUS the premium.*

### EXAMPLE.

What is the value of \$1000, exchange being at  $9\frac{1}{2}$ ?

$$1000 \times \frac{9}{40} = 225 \div 1.095 = 205.479.$$

Ans. £205.479 or £205 9s. 7d.

See Tables "Federal Money into Sterling."

---

## STOCKS, BONDS & INVESTMENTS.

---

XXVI. To find the dividend on any given number of shares of stock.

**RULE.**—*Multiply the par value of the Stock by the rate of dividend, expressed decimally.*

**EXAMPLE.**

How much will be received by the owner of 100 shares of Railroad stock, the par value of which is \$50, when a dividend of 6 per cent. is declared?

$$100 \times 50 = 5000 \times .06 = 300. \text{ Ans. } \$300.$$

**XXVII.** To find the Rate of dividend.

**RULE.**—*Divide the amount of the dividend by the par value of the Capital Stock.*

**EXAMPLE.**

The Capital of a Company is \$500,000; its net earnings for 6 months \$75,000; retaining \$15,000 as a Surplus, what rate of dividend can it declare?

$$75000 - 15000 = 60000 = \text{Amount of dividend,}$$

$$60000 \div 500000 = .12. \text{ Ans. } 12 \text{ per cent.}$$

**XXVIII.** To find what sum must be invested, that a given annual income may be obtained.

**RULE.**—*Divide the given annual income by the annual income of \$1 of the Stock, and multiply the quotient by the market value of \$1 of the Stock.*

**EXAMPLE.**

What sum must be invested in City 6's, at 90, to secure an annual income of \$1200?

$$1200 \div .06 = 20000 \times .90 = 18000. \text{ Ans. } \$18,000.$$

**XXIX.** To find what rate per cent. of income, will be derived from a given investment.

**RULE.**—*Divide the annual income of \$1 by the cost of \$1 of the Stock.*

**EXAMPLE.**

Bought 6 per cent. stocks at 90: what per cent. do they yield?

Annual income of \$1 = .06

Cost of \$1 of Stock = .90

$$.06 \div .90 = .06\frac{2}{3} \text{ Ans. } 6\frac{2}{3} \text{ per cent.}$$

XXX. To find at what price stock must be purchased to realize a given rate per cent. upon the investment.

*RULE.*—Divide the rate per cent. yielded by the Stock, by the required rate per cent.

EXAMPLE.

At what price must 7 per cent. stock be bought to realize an income of 8 per cent. on the investment?

$$.07 \div .08 = 87\frac{1}{2}. \text{ Ans. } 87\frac{1}{2}.$$

XXXI. To find what rate must be obtained that a given sum invested may yield a given income.

*RULE.*—Divide the given income by the sum invested.

EXAMPLE.

What rate per cent. must be obtained from an investment of \$5000, that \$650 annual income may be realized?

$$650 \div 5000 = .13. \text{ Ans. } 13 \text{ per cent.}$$

XXXII. To find the price which must be paid for a \$100 bond,—paying interest at a given rate, semi-annually, and having a given time to run to maturity,—so that the investment will yield the buyer any named rate per cent. semi-annually.

Let  $I$  = Semi-annual rate of interest of Bond.

“  $R$  = Semi-annual rate of interest of investment proposed.

“  $P$  = Premium paid for Bond—should  $I$  be greater than  $R$ .

“  $D$  = Discount of the Bond,—should  $I$  be less than  $R$ .

Let  $A$  = An Annuity (or Semi-Annuity) which put out at Compound Interest every six months, for a period 6 months less

than the Bond has to run, will amount to exactly \$1.

Then  $P$  or  $D$  can be found by the following formulas:

$$\left. \begin{array}{l} \text{Formula for Bonds} \\ \text{bought at Discount.} \end{array} \right\} \frac{R-I}{A+\frac{R}{100}} = D.$$

$$\left. \begin{array}{l} \text{Formula for Bonds} \\ \text{bought at Premium.} \end{array} \right\} \frac{I-R}{A+\frac{R}{100}} = P.$$

The rate of *compounding* is always assumed by these formulas to be at 3 per cent. every six months; six per cent. per annum, being the *average* rate at which re-investments can be made in the U. S.

#### EXAMPLE.

What price should be paid for a 10 per cent. \$100 Bond having 4 years to run, interest payable semi-annually, so that the money invested shall yield the buyer the equivalent of 4 per cent. during that time?

$R = 2$  Semi-annual rate required.

$I = 5$  " " Interest on Bond.

$A = \$0.11245639$ , the Semi-annuity which in  $3\frac{1}{2}$  years compounding will amount to \$1.

Then, by the 2d formula,

$$\frac{5-2}{11245639+.02} = \frac{3}{.13245639} = 22.6489 = \text{Premium.}$$

$$100 + 22.6489 = 122.6489 \quad \text{Ans. } \$122.6489.$$

The above answer is *correct to a mill*; but its verification is necessarily omitted, requiring as it would, at least five pages of this book. Any person

who is versed in Compound Interest Calculations can make the Table of Annuities required.

NOTE.—The Author is indebted to John W. Torrey, Esq., late Cashier, Corn Exchange Bank, Phila., for the above rule, which has never before appeared in print. It forms the basis of the calculations in Mr. Torrey's *Bond and Investment Tables*, a work which sheds a new light upon the subject to which it relates, and which it would be well for every person who deals in bonds and securities to consult.

The Authors of School Arithmetics have generally avoided all mention of the subject, for reasons which it is easy but painful to surmise; while the Commercial Arithmetic makers furnish their pupils with rules which are either grossly inaccurate or ludicrously inadequate. In one instance, the Authors (principals of several Commercial Colleges) after darkly alluding to the abstruse character of the subject, content themselves with a rule which they confess only approximates to the truth, and then fix the standard of truth by a popular Table, which unfortunately happens to be incorrect! In another case, the Author (principal of another Commercial College) after stating his rule, naively remarks in the foot note,—“*No account is taken, in this rule, of interest on the semi-annual payments of interest*”: thus disregarding an essential element of the calculation, and “playing Hamlet with the Prince of Denmark left out”!
